

A BREAKTHROUGH SOLUTION FOR PAINFUL DIABETIC NEUROPATHY

Addressing the burden across Tribal and IHS healthcare systems

Diabetic neuropathy continues to impact Native communities at disproportionately high rates—driving chronic pain, reduced mobility, and increased risk of serious complications.

THE GAP IN CARE

- ✓ Persistent pain despite standard medications
- ✓ Limited effectiveness from gabapentin, opioids, and other therapies
- ✓ Declining mobility and reduced quality of life

THE SOLUTION

A non-pharmacologic, FDA-cleared **therapy** designed to deliver **meaningful pain relief**—directly within Tribal and IHS care settings

CLINICAL IMPACT

- ✓ Reduces neuropathic pain
- ✓ Supports improved mobility
- ✓ Enhances patient quality of life
- ✓ Helps address a critical gap in chronic pain management

BUILT FOR NATIVE COMMUNITIES

- ✓ Tribal clinics
- ✓ IHS facilities
- ✓ Community health programs

WHY THIS MATTERS FOR TRIBAL HEALTH SYSTEMS

- ✓ Expands access to non-opioid treatment *options*
- ✓ Supports proactive, patient-centered care
