

BRING ADVANCED DIAGNOSTICS IN-HOUSE

TURNKEY HIGH-COMPLEXITY CLIA LAB BUILT FOR CLINICS & HEALTH SYSTEMS

Capture revenue, improve turnaround, and deliver better patient outcomes.

THE CHALLENGE

- ✓ Revenue leaving to outside labs (LabCorp, Quest, etc.)
- ✓ Delayed turnaround impacting patient care
- ✓ Limited visibility and control over diagnostics
- ✓ Growing test volume (500–600+ tests/month typical)

Healthcare organizations are already ordering these tests—but losing both revenue and control in the process.

THE SOLUTION

A turnkey, high-complexity CLIA lab built directly within your clinic:

- 💰 No capital expenditure required
- 🏠 Minimal space footprint
- 👥 Fully managed implementation
- 🛡️ Provider-owned revenue model

Enables in-house testing and revenue capture—without operational burden.

HOW IT WORKS

IN-HOUSE LAB DEPLOYMENT

We design, build, and implement a fully operational lab inside your clinic—seamlessly integrated into your existing workflows.

ADVANCED TESTING CAPABILITIES

Supports high-complexity diagnostics, including:

- Molecular testing (PCR, qPCR)
- Next-Generation Sequencing (NGS)
- Infectious disease, oncology, and specialty panels

Fast Turnaround

WHAT THIS ENABLES

- ✓ Capture revenue from tests already being ordered
- ✓ Create a consistent ancillary revenue stream
- ✓ Improve turnaround time and patient outcomes
- ✓ Reduce reliance on outside labs

FULL-SERVICE MODEL

We handle everything:

- ✂️ Lab design & buildout
- 📄 Equipment & installation
- 👥 Staffing & training

- 🛡️ CLIA compliance & certification
- 📄 Billing & reimbursement
- 🎧 Ongoing operations & support
